

How to View Your Students in Zoom

Once everyone has logged into Zoom, the two most commonly used layouts for viewing participants are:

- 1) Speaker View. This allows you to see whomever is speaking at the moment.
- 2) Gallery View. This allows you to see up to [49 people at once](#) (in full screen mode). Below is an example of Gallery View. If you'd like to switch views, click "Speaker View" in the upper right-hand corner. Note: There may be more than one screen of students so you might have to click on the blue arrow (circled below) to toggle between screens of participants.

[Review the Zoom website for more layout options.](#)

If you are screensharing and would like to see more participants at once, grab the gray horizontal line between the screen and the participants and drag it toward the screenshare ([as shown below in the Zoom side-by-side layout](#)).
