Pulse Surveys are a way to check on students throughout the semester, rather than just the beginning and end of the semester. [Surveys](#) allow you to collect student feedback on the course while also giving you insight into student s progress and experience. Remember, Surveys do not have to be presented live, they can also be emailed to students to [complete asynchronously](#).

Entry and exit tickets are quick pop quizzes that you give either before or at the end of the lecture. These do not necessarily need to have a grade associated, but instead can be a quick check in on the students knowledge. This activity will help you understand how the students are taking in the course material and help you direct how the class should go.

Check out the Poll Everywhere blog for articles about integrating our product into your everyday class routine.
