

The NVivo work area

The NVivo work area provides easy access to all your project material.

See the contents of a folder in List View

Most NVivo commands are available on the menu or the ribbon

Navigation View lets you organize your material into folders

Move between currently open items

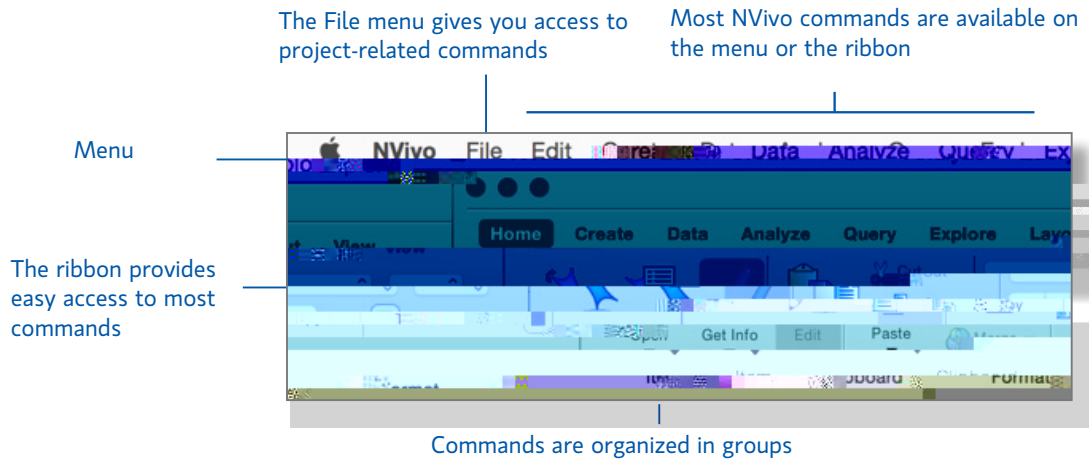

Work with your sources, nodes or other project items in Detail View

A screenshot of the NVivo software interface. The interface is divided into several colored sections: a top menu bar (yellow), a ribbon (pink), a navigation pane (green), and a main workspace (orange). The workspace is filled with various colored icons representing project items. Callout lines point from text labels to specific parts of the interface: 'See the contents of a folder in List View' points to the top right; 'Most NVivo commands are available on the menu or the ribbon' points to the ribbon; 'Navigation View lets you organize your material into folders' points to the green navigation pane; 'Move between currently open items' points to the bottom left; and 'Work with your sources, nodes or other project items in Detail View' points to the bottom right.

Work with the ribbon or the menus

You can work with NVivo using the menu commands or the ribbon. On the ribbon, commands are organized into logical groups, collected together under tabs. Each tab relates to a type of activity, such as creating new project items or analyzing your source materials.

Navigation View

Navigation View helps you to organize and easily access all of the items in NVivo:
