

**Note:** A solid grasp of logic, graphical methods, maximization / minimization techniques, and partial derivatives is essential. Class lectures, homework, and exams will make regular use of algebra and calculus since most economic concepts lend themselves to mathematical expression. If the student becomes lost or is unfamiliar with some of the economic concepts or mathematical techniques early in the class, the student should let the instructor know as soon as possible.

## 7 Econ 106 Course Schedule and Readings

Week	Date	Topics & Readings	Due
