ENVS/ECON 107, Environmental Economics, Spring 2022

Course and Contact

Course Learning Outcomes (CLO)

Upon successful completion of this course, students will be able to:

1. Formulate conclusions by applying the basic concepts and tools from environmental economics and develop an understanding of how such conclusions can be used to guide environmental policy.
2. Understand the political and economic aspects of pollution, renewable and non-renewable resource consumption.

Required Texts/Readings

Textbook

Environmental and Natural Resource Economics: A Contemporary Approach (4th Edition), by Harris, J.M. and B. Roach
