### Course Description

1. **Department LO 1 - Content Environmental Literacy:** Students are able to write a logical analytical paper using good writing style and construction supported by appropriate research
2. **Department LO 3 - Content Environmental Literacy:**

**7. In-class writing assignments and participation:** During lectures, I will ask questions about the course materials. These questions will help determine whether I have conveyed the information adequately in lecture, whether you are keeping up with and understanding reading assignments, and they will provide for direct feedback about what you are learning through y complete in-class writing analysis assignments to strengthen your EIA skills. Be aware that we will also complete group work in class. **NOTE: In-class assignments cannot be made up (10 percent).**

**8. Draft documents:** As in real impact assessment, the drafting process and public presentation are taken very seriously. **First draft documents are worth more than double final drafts. In addition, I will not accept draft documents after the due date. All individual and group work will be due at the beginning of class via Turnitin.com.**

**9. Late Assignment Policy:** All assignments are due by the beginning of class on the deadline date. Late assignments will be considered **ONLY** for legitimate circumstances, when arranged in advance, or with a

**10.** If you are absent, it is your responsibility to pick up any materials during my office hour. I will not provide my curricula via email, unless you have medical documentation.
