

DIGITAL FORENSICS

Gain hands-on experience as a digital evidence forensic investigator

The Silicon Valley Digital Forensics Laboratory is located near San Jose State University. It provides students the opportunity to obtain industry skills training and experience conducting computer forensic investigations. Partnering with criminal justice agencies, students process digital device evidence from active criminal cases and report findings to relevant agencies. Students can also engage in digital forensics research with faculty members.

• Apply classroom education to real-world application
• Acquire training and experience using industry tools and techniques
• Complete forensic investigations on active criminal cases
• Conduct digital forensics education research

investigations. Partnering with criminal justice agencies, students process digital device evidence from active criminal cases and report findings to relevant agencies. Students can also engage in digital forensics research with faculty members.

All are welcome to apply but priority will be given to FS majors.
