techniques and how to use them to answer questions commonly confronted by social scientists. As we move through the course material, you will find that an understanding of a given topic builds on what has been covered previously. Thus, it is in your best interest to stay current on the readings, follow power-point siles, and ask questions through email if you are unsure about a topic.

Please note that this is an online course in which students will 1) watch videos of my course lectures that have been posted on Canvas, and 2) take online quiz, submit paper critiques and research note, and complete assignments that, as noted above, will also be posted on Canvas. Hence this course is essentially located on Canvas, to which enrolled students automatically have access through their SJSUOne account. All course material, except for the course book, will be available through Canvas. (A word to the wise: Students who do not watch the course lectures in sequential order as the semester progresses, or do not take notes on the contents, or do not do the required course readings will find it impossible to get a good grade and may well end up failing this course. Cutting corners, which is never a good idea for students who are serious about learning, is likely to lead to disaster in an online course!) To reiterate, course materials such as the syllabus, handouts, notes, assignment instructions, etc., can be found on the Canvas learning management system course website. You are responsible for regularly checking with the messaging system through MySJSU to learn of any updates.
