

The ME Student Project Center, located in Room ENG123 (herein after called MSPC), is a supervised space administered by the ME Department that provides students with equipment and tools to enable them to fabricate physical artifacts in a safe manner during their program of study in the department. The facility is intended to serve the needs primarily of ME students, but others may be granted access at the discretion of the Department Chair or their designee(s). In all cases, access to the MSPC is a \_\_\_\_\_, NOT a right. Access to the MSPC is earned through safety training and maintained through adherence to operating rules and policies. Access to the MSPC can be suspended or revoked at any time by the ME Department for failure to consistently follow MSPC policies, violations of safety practices, endangering or causing conflict with other users, etc.

The policy for access to the MSPC and operation of equipment within the MSPC is articulated below:

1. Access to the MSPC classified by 3 different levels: \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_.
  - a. \_\_\_\_\_ access is only granted on a case-by-case basis following discussion with the \_\_\_\_\_.
