asked that in the last resolved clause, the committee add wording about forwarding the Guidelines to the Senate for Senate approval.

Senator Shifflett said that she hoped that we would have an ethic in the IT area, and that it wouldn't just be a programmer determining what keywords would be used when scanning. Senator Shifflett asked for clarification in item number 6 and 13 on page 7. What is scanning meant to be here? AVP Gorney-Moreno said that scanning is like when people are trying to catch credit card transactions. Senator Shifflett also asked what registering an SJSU IP address with any other domain name was, and said this doesn't make sense t

system. There are pieces of this that can all fit together. However, we would need to be politically a
