Notes: Studies category: Area =: Culture, Civilization, Globalization; Understanding

In a world with rapidly diminishing resources; new conflicts are emerging based on factors such as ethnicity, economic opportunity, religion, and nationalism. Explore global circumstances leading to conflict.

This course is a geographical exploration of some of the most pressing contemporary global issues in politics, economy, security, human-environment relations, and the interaction of cultures. Readings, films, class exercises, short essays, and discussions are all used to gain a better understanding of these complex global issues and their geographical dimensions. Students will develop their ability to think critically, independently, relationally, and contextually and to communicate their ideas effectively, particularly in writing.
