

## **Chapter Three: Research Design and Methodology (for Descriptive-Driven DiP)**

### *Overview*

Start with a brief description of your Problem of Practice and research questions. Briefly describe the instruments you plan to use to collect your data, and explain how such instruments and data you will collect are related to various components of your theoretical framework.

## **Chapter Three: Research Design and Methodology (for Intervention-Driven DiP)**

*Overview*

*Sample*

*Selection Procedures*

*Demographic Characteristics*

*Data Collection*

*RQ 1 that is descriptive-driven: XXXX*

*Interviews and Procedures*

*Surveys and Procedures*

*Others*

*RQ 2 that involves your intervention: YYYYY*

*Design, Development, and Implementation of the Intervention*

Describe how you designed, developed, and implemented your intervention (e.g., PD for subjects).  
Provide a logic model and theory of change. Include timeline and sequence of activities.

*Assessments and Procedures*

*Interviews and Procedures*

*Others*

*Data Analysis*

*RQ 1*

*RQ 2: Example: Mixed Methods*

*Describe how you employed mixed methods to assess the impact of your intervention.*

*Rationale for the Methodology that Informs Your Research Design*
